Branding of the client's choice can be added to the CargoBox and vehicle

The customer journey

1. Client orders a delivery
2. Autonomous delivery vehicle arrives at the pick-up location
3. Order is placed into the CargoBox
4. Software determines the most efficient route to the delivery address, sends the client a pickup code and the arrival time
5. Delivery vehicle drives to the destination address
6. End-customer inserts pickup code
7. Parcel is retrieved from the vehicle
8. Delivery vehicle continues to fulfil next order
